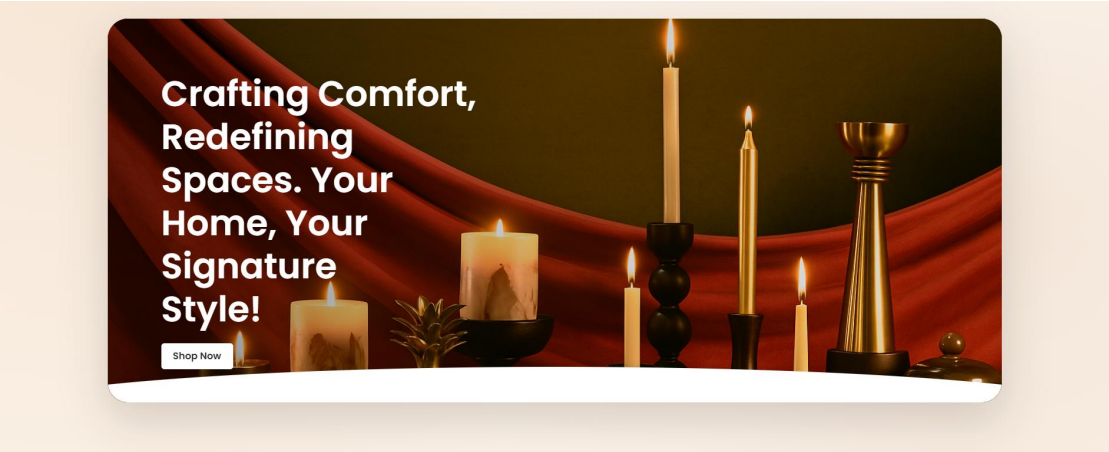
Candleora UI Corrections

1. The banner should be **full width**, and the **font size** of the banner text should match the VD (original design). Currently, it is taking up too much vertical space. Also, the **"Shop Now"** button should be clearly visible as VD.

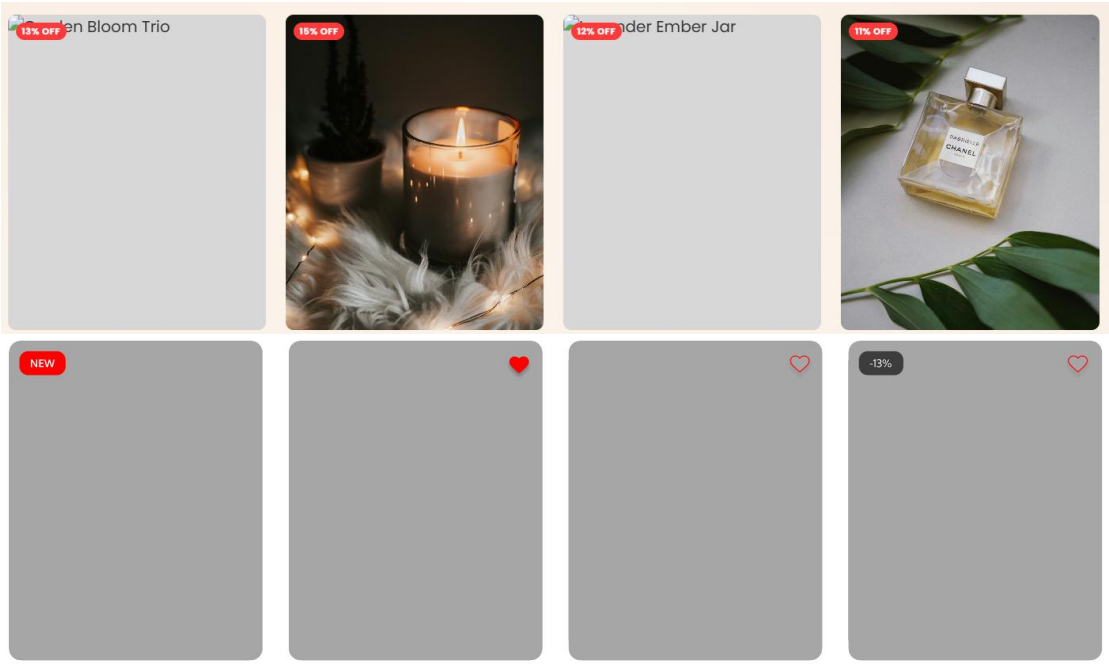


2. Slightly **increase the font size** of the navigation items: Home, Shop, About Us, Contact, Orders.

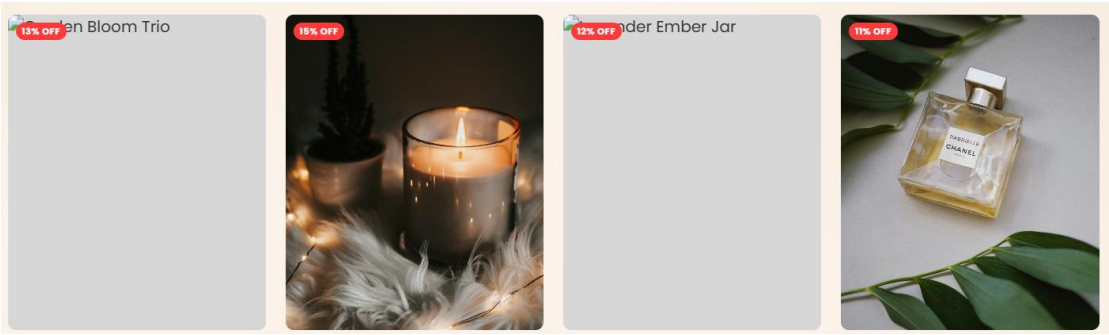
3. The **background** should be strictly **white**, not cream or yellow.

4. Ensure that **font sizes** for **all headings and subheadings** are consistent across the website.
   Ex. Best Selling Products, Shop, Contact, View our range of categories, etc.

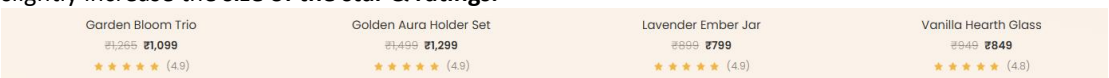
5. Add a **heart icon button** inside the product cards so users can save items to their wishlist.
   And When a user selects the favourite (heart) icon, it should turn red, indicating that the product has been added to the wishlist.



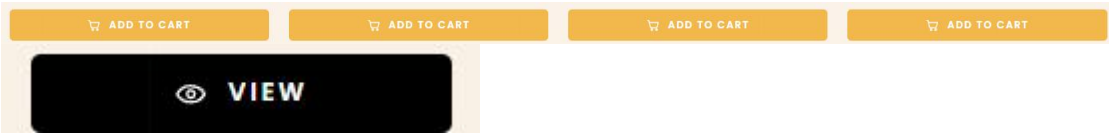
6. Inside the cards, labels (ex. 13% Off) should have a slightly **increased font size** and use a **semibold** font weight.



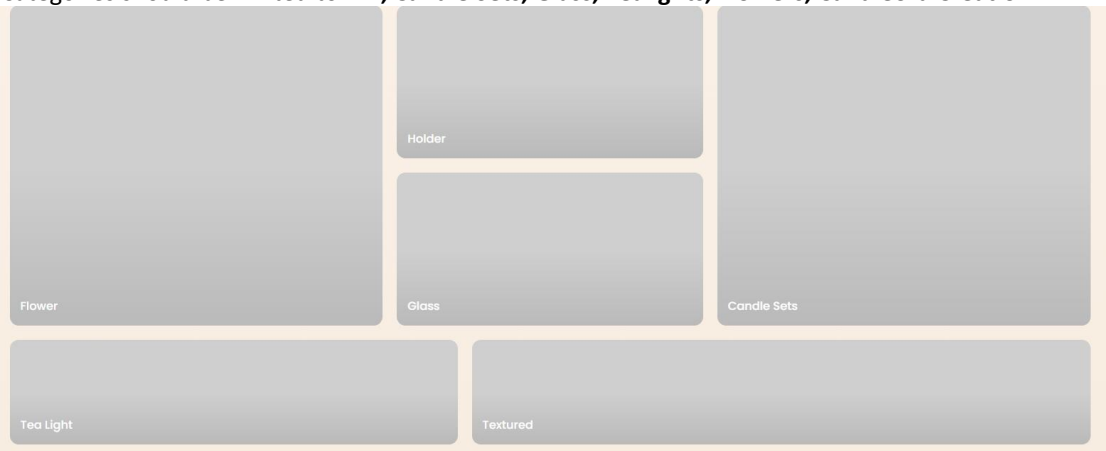
7. **Increase the font size of the product names** at the bottom of the cards for better visibility. Also, slightly increase the **size of the star & ratings.**



8. **Slightly increase the font size of all buttons**. Ensure button sizes are consistent across the entire website.

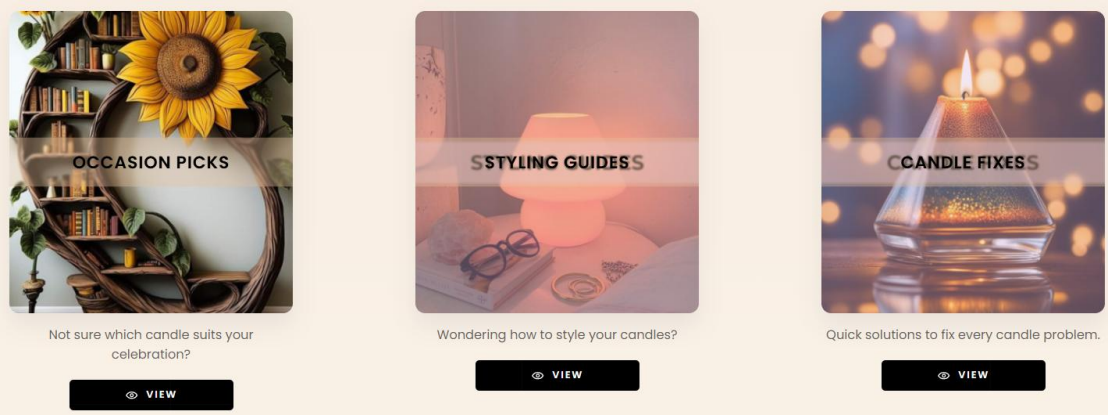


9. Categories should be limited to: **All, Candle Sets, Glass, Tealights, Flowers, Candleora Creation.**

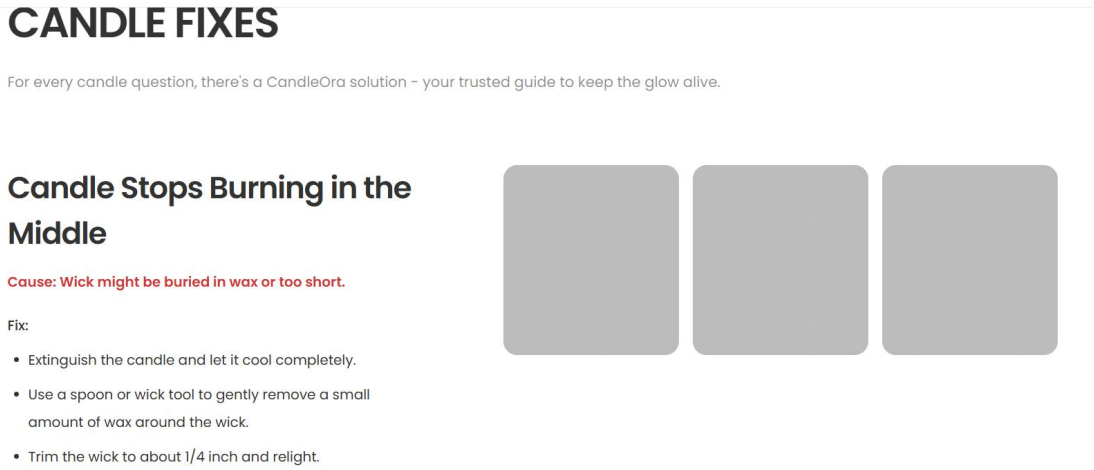


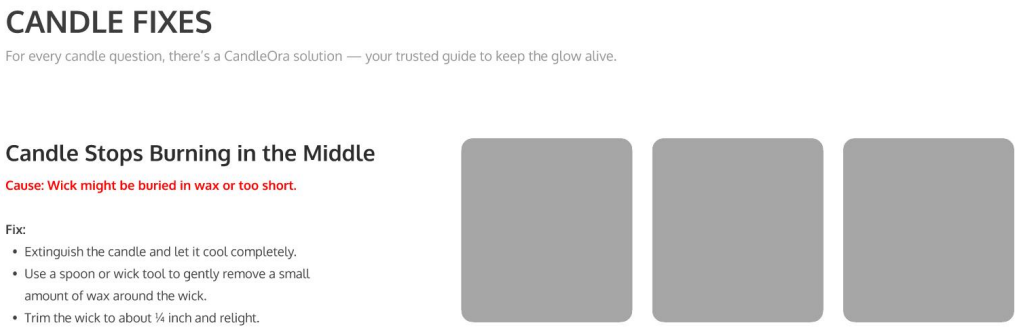
10. **Add this line and increase its font size:**
"Free Delivery & Free Gift when you spend over Rs. 1999/-"

11. **Remove the styling guides.**



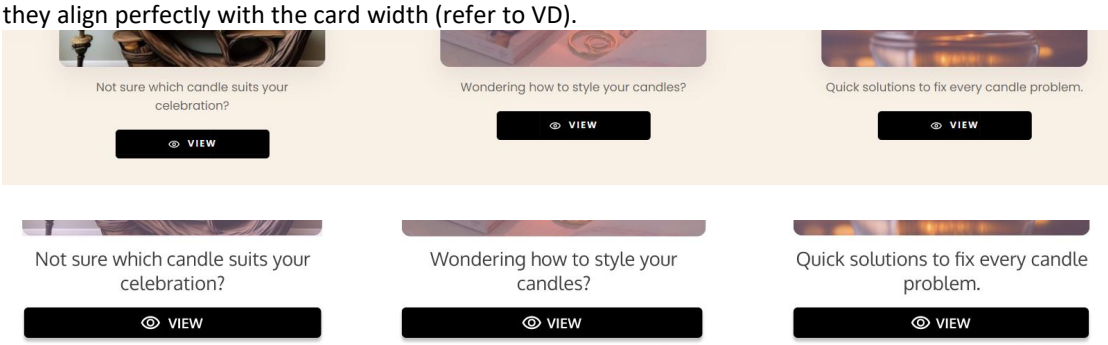
12. For the candle fixes page, **reduce text spacing** as it is currently taking up too much space. The **boxes beside the text should be aligned to the left**, following the original VD design.





13. When a user clicks on **Home/Shop/About Us/Contact/Orders**, **<u>an underline</u>** should appear on the active page to indicate the current page.

14. The **black buttons** on the product cards currently do not match the **card width**. Adjust them so they align perfectly with the card width (refer to VD).

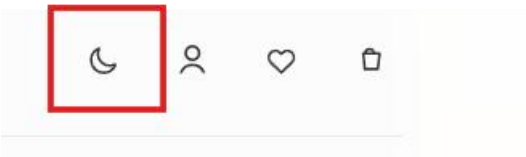


15. **Increase the font size** of the Happy Customer card text so it is clearly visible

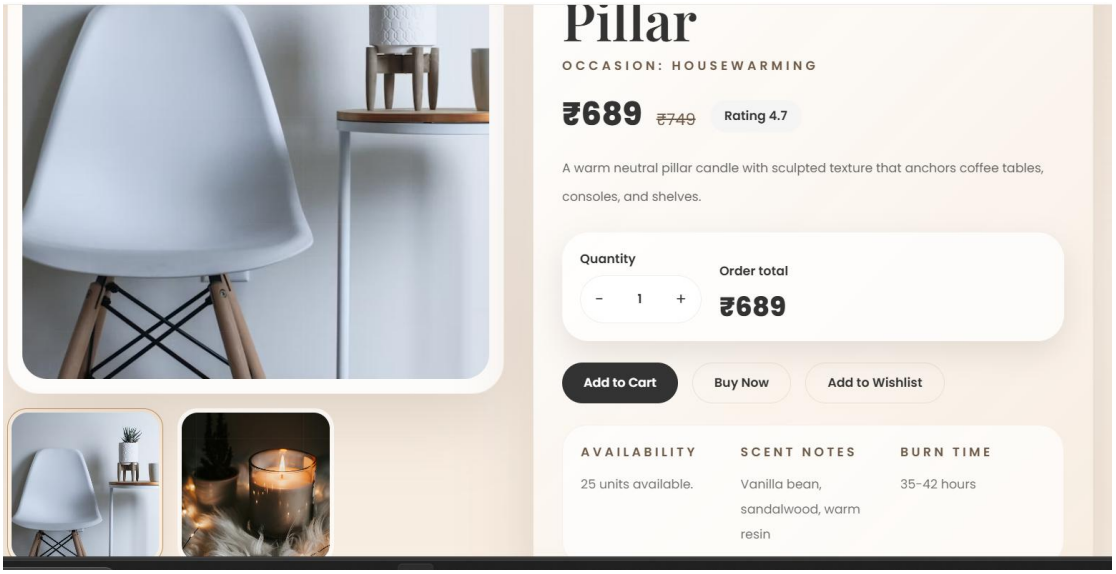
16. **On hovering** over each icon, **a tooltip should appear.**
For ex:
* Cart icon → "Cart"
* Heart icon → "Wishlist"
* Apply similar tooltips for all other icons.

17. On the shop listing page, the **Load More** button is **missing** at the bottom. This should be added, especially in cases where a category contains more than 8 items.

18. **Remove the theme switch** icon button from the top bar.

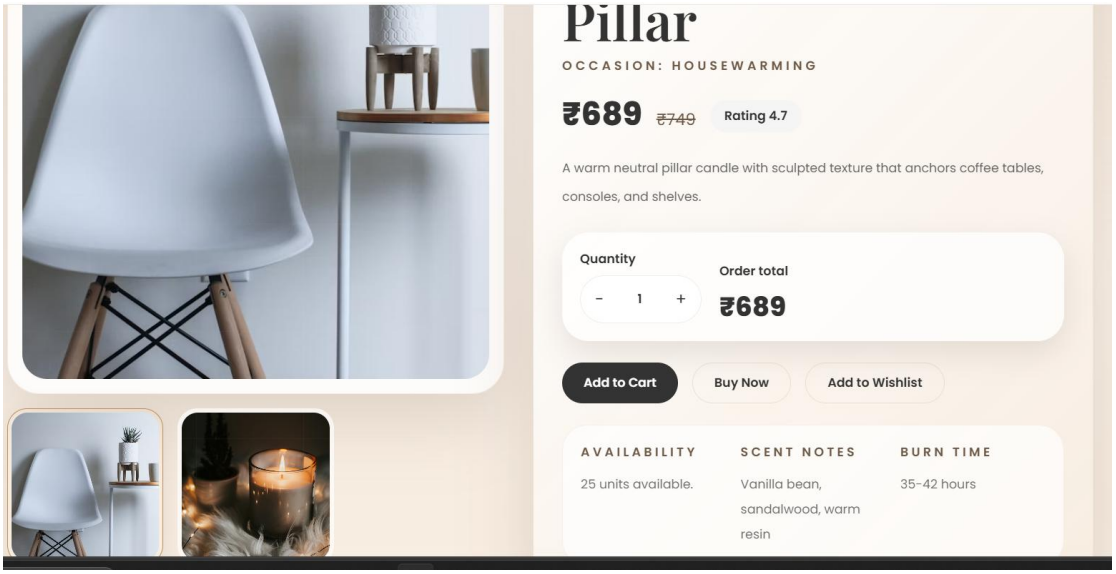


19. On the product view page, there are two buttons: “Add to Cart” and “Buy Now.” The **Buy Now** button should be highlighted in **black** to make it more prominent.

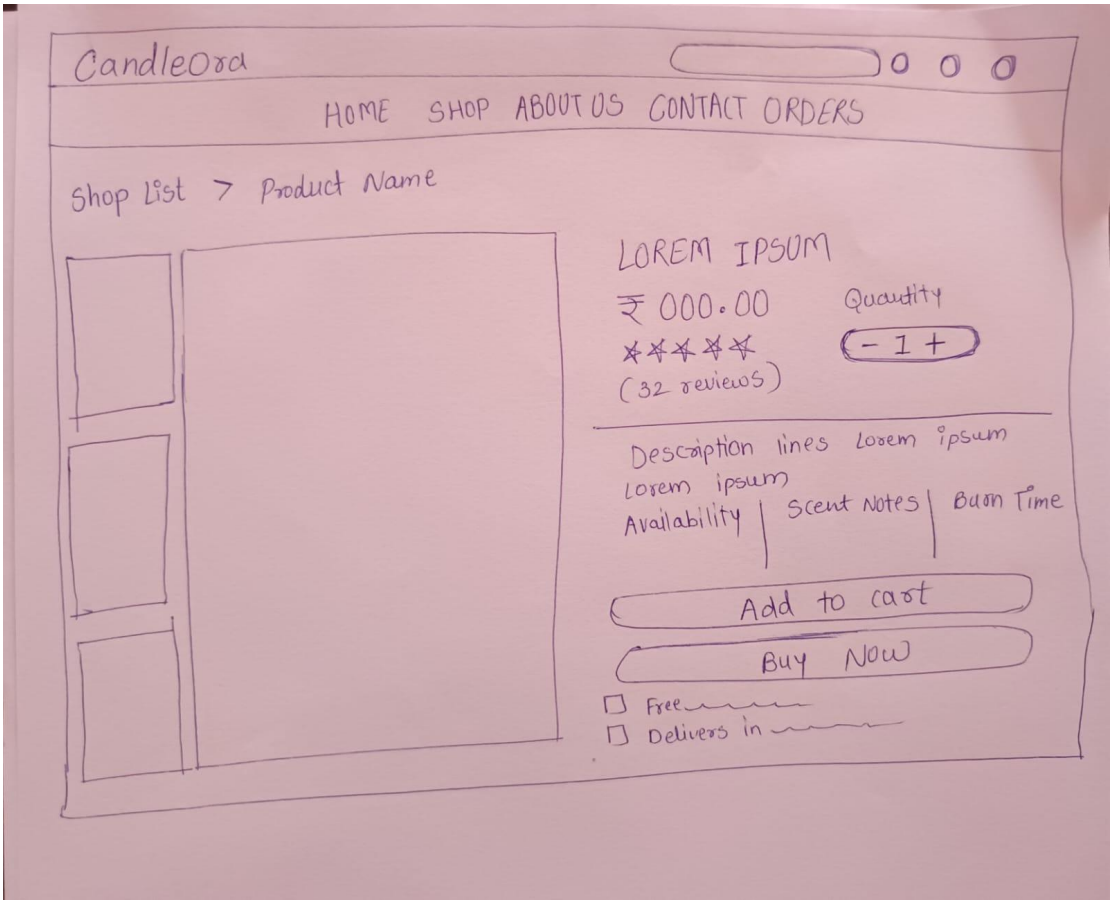


20. On the product view page **manage spacing** and I am suggesting you a **layout replace** to that

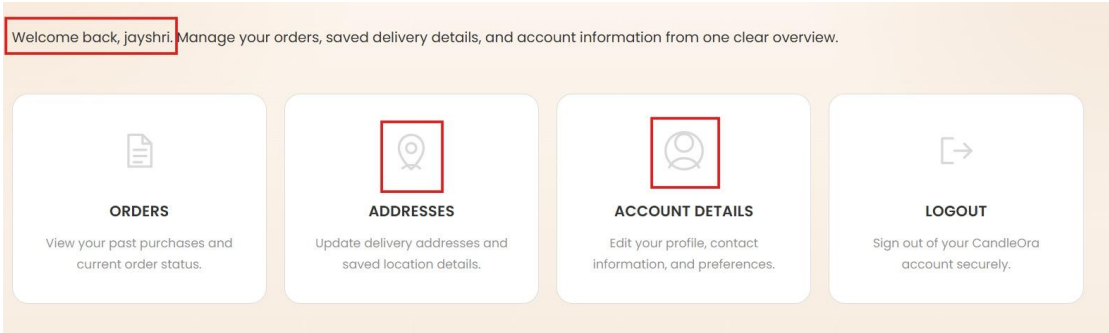
From this-



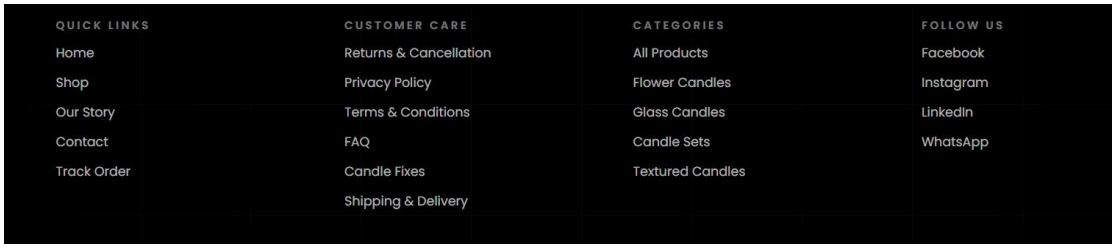
To this-



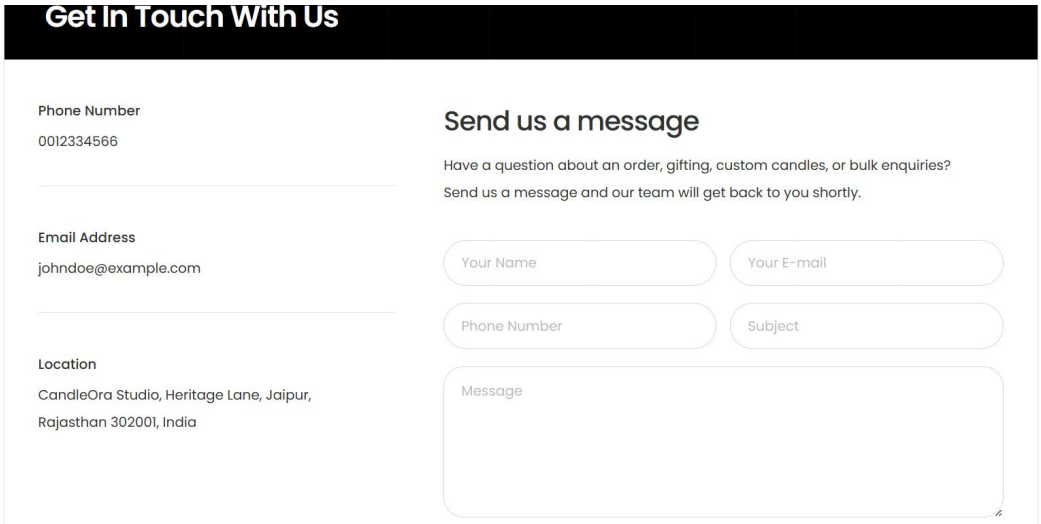
21. Rewrite the text **“Welcome back, Jayshri!”** and **correct those icons** currently looking distorted.



22. We need to modify and make some changes in the footer.
In the Customer Care section:
Add Terms & Conditions and FAQ under Privacy Policy.
In Categories, show only: All, Sets, Glass, Tealights, CandleOra Creations.
In the Follow Us section:
Keep only Instagram, WhatsApp, and Facebook.



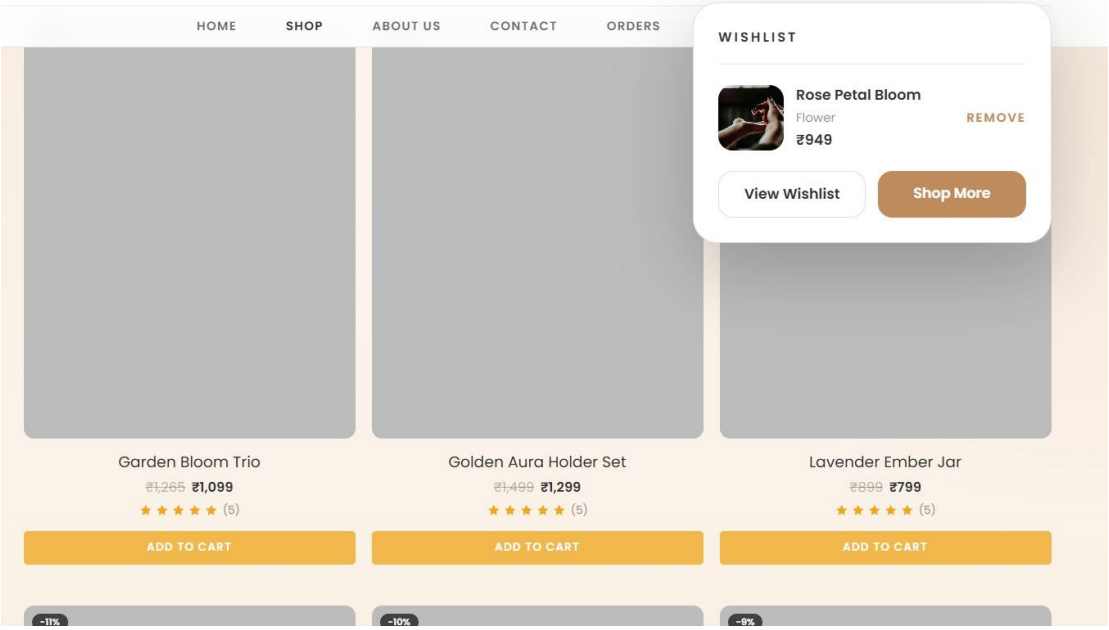
23. On the Contact Page, **update** the following information:
Phone Number:* 8999908639
Email Address:* candleora25@gmail.com
Location:* (add/update accordingly)
Also, slightly adjust the layout spacing for better alignment.



Note:
Across the application, only the following colors should be used:
Yellow (for button default and hover states)
White (for background)
Black (for default text/state)

Green (for selection state, e.g., “Added”)
Red (for wishlist)

Please ensure the hex codes for these colors are correct and consistent throughout the application.



Only two font styles should be used:
One for headings
One for body text

Font sizes should be limited to only three types:
Large
Medium
Small

Kindly review and ensure that no additional font sizes are being used anywhere in the application.
